PUBLIC HEALTH REPORTS.

UNITED STATES.

Certificate of disinfection of rags.

DEPARTMENT OF STATE,
Washington, D. C., April 16, 1901.

To the consular officers of the United States:

Referring to the Department's circular of March 12, 1900, in regard to certificates of disinfection of rags, you are instructed, when issuing these certificates at inland consulates, to attach the original copy to the copy of the invoice intended for the consignee and hand the duplicate to the shipper, with instructions to present it to the consul at the seaport at which the rags are to be placed on board the vessel. This copy of the certificate is to be used by the consul at the seaport as evidence upon which to issue a bill of health and is required to be attached to the bill of health issued to the vessel. The importance of presenting the copy of the certificate to the consul at the seaport can be readily understood, in view of the fact that, in the absence of proof of the disinfection of the rags at the inland consulate, the consul at the seaport may require them to be disinfected again and may withhold a bill of health until the regulations shall have been complied with.

Consuls will also keep upon the files of the office a copy of each certificate of disinfection issued.

The form to be used for certificates of disinfection is Form No. 189, entitled "Certificate of Disinfection of Merchandise."

THOS. W. CRIDLER, *Third Assistant Secretary.*

Imposition of restrictions upon nonimmune travel from Cuba.

[Department Circular No. 53.]

TREASURY DEPARTMENT,
OFFICE OF THE SECRETARY,
Washington, D. C., May 6, 1901.

To quarantine officers and collectors of customs of the United States:

Owing to the reappearance of yellow fever in Cuba, the provisions of Department Circular No. 48, dated April 29, 1901, postponing certain restrictions upon nonimmune travel from Cuba until May 15, 1901, are hereby revoked, and the restrictions upon such travel prescribed by the United States Quarantine Regulations are in force from and after this date.

L. J. GAGE, *Secretary.*

[Reports to the Surgeon-General United States Marine-Hospital Service.]

The Doric and Lawton arrive at San Francisco, having had smallpox en route.

SAN FRANCISCO QUARANTINE STATION,
Angel Island, April 25, 1901.

SIR: I have the honor to report the arrival at this station on April 17, of the British steamer *Doric*, from Hongkong, and of the army transport *Lawton*, from Manila, each with a history of smallpox aboard en route.

The case on the *Doric* was in the person of the chief officer, who developed his first symptoms—headache, backache, and fever—on March 29. He continued on duty until the 31st, when the symptoms became aggravated and he was confined to bed. An erythematous eruption appeared on the face, neck, and abdomen, which, within a few hours, showed evidence of becoming papular. Smallpox was suspected and the case promptly isolated in the hospital aft. A man, protected by having had an attack of smallpox several years before, was selected to attend the case and went into isolation with him. After that there was no communication between the officer suffering with the disease and any other persons aboard, with the exception of the ship's surgeon, who exercised the necessary precautions to prevent any infection being carried by his clothing.

The room from which the case was taken is one of four in a house on the spar deck forward, which is used exclusively by the European officers of the deck department. This section was given a preliminary fumigation with formaldehyd gas, after which all baggage, bedding, etc., from the chief officer's room was either destroyed or removed to the isolation hospital and the room disinfected with sulphur dioxide, washed down with bichloride of mercury solution, and painted.

The steerage passengers had been vaccinated several days before and as soon as the case of smallpox was diagnosed the ship's surgeon vaccinated all the members of the European crew and the majority of the cabin passengers. This exhausted the supply of vaccine. The oriental crew, the surgeon informed me, are vaccinated about every six months and he considered them protected.

On April 9 the case was removed from the vessel and sent to the hospital at Honolulu. All baggage, bedding, etc., which had been exposed to infection in the isolation hospital aboard the vessel was either sent ashore or destroyed, and the hospital thoroughly disinfected and painted.

Upon arrival at this station no other case of suspicious illness had developed aboard, so after a careful inspection and vaccination of all persons aboard, the vessel was given pratique. The above report is based on statements made by the master and surgeon of the *Doric* who made affidavit to the effect that these statements were true.

The history of the outbreak on the transport *Lawton* was as follows:

On March 17, when the vessel was one day out from Manila, one of the regimental officers presented himself with a severe headache and backache, and a temperature of 103.8° F. The next day an erythematous flush of face, neck, and abdomen appeared. Smallpox was suspected. and the case was confined to his stateroom and as completely isolated as was practicable. The other officers who had been occupying the same stateroom that the suspect was in went into isolation with him. Fortunately one of these officers was a physician, and so a close observation was made of the symptoms as they developed. The eruption became papular on March 21 and the diagnosis was no longer in doubt.

The 2 officers in the room with the case were then, after a change of clothing, sent to another stateroom, and the smallpox case continued in isolation in the room where he was first affected. All persons aboard had been vaccinated the day after leaving Manila. On March 23, the transport having arrived at Nagasaki, the case was sent ashore, all exposed textile fabrics removed with the case disinfected or destroyed, and the room thoroughly disinfected with sulphur dioxide gas, followed by a scrubbing with a strong solution of bichloride of mercury. The Japanese quarantine authorities at Nagasaki bathed, and disinfected the body clothing of, all persons aboard the vessel and fumigated the staterooms, troop decks, and forecastle. The transport left Nagasaki on March 24, and on March 26 a second vaccination was made of all persons who did not have "a take" from the vaccination made just after leaving Manila.

On March 31 the 2 officers who occupied the stateroom with the smallpox case to the time that the eruption became papular developed suspicious symptoms. They were removed immediately to the isolation hospital, all baggage, bedding, etc., in their room being either taken with them to the hospital or destroyed and the room disinfected.

Within two or three days after these 2 suspects had been isolated in the hospital, symptoms appeared, and each proved to be a well-marked case of smallpox.

The isolation hospital on the *Lawton* is well located, being aft, just over the stern of the vessel, and not communicating directly with any living apartments.

Two hospital corps men detailed to attend the cases were also isolated in the hospital, the only passageway leading to the hospital being kept guarded continually, and no one communicated with those in isolation except the transport surgeon, who changed clothing and bathed after each visit to the ward.

On April 7 the 2 smallpox cases, with their attendants, were turned over to the health authorities at Honolulu and taken ashore. All exposed baggage and bedding was sent ashore or destroyed, after which the isolation hospital was thoroughly disinfected by repeated fumigation with sulphur dioxide and washing with bichloride of mercury solution. No other suspicious cases had developed aboard to April 17 when the vessel arrived at San Francisco.

The above history of development and measures taken to suppress smallpox on the transport *Lawton* is based on statements made by the transport surgeon, to the salient points of which affidavit was made by him.

To sum up it appears, first, that case No. 1 contracted his infection in Manila, cases Nos. 2 and 3 contracted their infection from case No. 1 while confined to same stateroom with him; second, that disinfection practiced at Nagasaki was effective, since no one was affected afterwards besides the 2 men certainly exposed before this disinfection was done; third, that the isolation of cases Nos. 2 and 3 was good, and fourth, that focus of infection established in the isolation hospital by cases Nos. 2 and 3, judging by the measures adopted, must have been entirely obliterated at Honolulu.

The *Lawton* arrived at this station late in the afternoon of April 17, and inspection revealed nothing in the least suspicious, excepting 2 cases of fever, both of which had had chills earlier in the day. These cases were among the steerage passengers and there was a history of malaria in both cases.

The vessel was held in quarantine until the next morning, when the

2 fever cases of the evening before, were satisfactorily proved to be malarial, so that after a second careful inspection of all persons aboard pratique was given. * * *

Respectfully, L. L. LUMSDEN,
Assistant Surgeon, U. S. M. H. S., in Temporary Charge.

Smallpox on the steamship Caithness at Port Townsend, Wash.

PORT TOWNSEND, WASH., *April 30, 1901.*

SIR: Regarding smallpox on board the British steamship *Caithness*, from Mororan via Comox, I have the honor to make the following report:

The first man, a sailor, was taken sick two days before leaving Mororan. Apparently, he contracted his infection in Tsing Tau, which place they had left ten days before and where the vessel had lain two weeks. His case was a mild one and he was never very sick. Five other mild cases followed among the sailors and firemen. On arrival here the first case had practically recovered. There were 5 mild cases in the papulo-pustular stage, 1 severe case in the papular stage, and another man who had been coming down with the disease for a day or two and on whom the rash had not yet appeared, making 8 cases in all. The last case has become confluent and his condition is serious.

The usual procedures as to disinfection and vaccination were taken and the ship and all hands, including the Victoria pilot, are now being detained the full fifteen days. Mr. Klocker, ship agent, and Customs Inspector Lehr, who had been exposed to the infection, were also taken to the station, bathed, their clothing disinfected, vaccinated, and detained five days until it was clear that their vaccination was successful. Mr. Bartlett, a ship agent, who had been on the ship's ladder, was given a bichloride bath, vaccinated, and his clothes disinfected.

If no new cases break out the vessel and well members of the crew will be discharged next Sunday. * * *

Respectfully, M. H. FOSTER,
Assistant Surgeon, U. S. M. H. S.

Smallpox among the Indians at Sitka, Alaska.

SITKA, ALASKA, *April 9, 1901.*

SIR: Upon my arrival here, Special Deputy Collector McNair called my attention to the prevalence of smallpox among the Indians, and to the letter of the collector of customs of February 14, 1901, reporting the fact.

As it was spreading and nothing being done to stop it, I advised him to employ a physician at such time as the steamers were here to inspect both incoming and outgoing passengers. This has been done, and measures have now been taken to confine the disease to the Indians. It is of a very mild form, and it is believed will soon disappear. Until such time an inspection will be continued, and it is hoped this is all that will be necessary, and will stop it being carried to other places.

It is also reported that various places in the district are infected, but as nothing definite is known, it is not thought to be dangerous.

Respectfully, D. H. JARVIS,
First Lieutenant R. C. S., Acting Special Agent.

Hon. SECRETARY OF THE TREASURY.

Arrival at Reedy Island Quarantine of vessels from West Indian and Mexican ports.

REEDY ISLAND QUARANTINE,
via Port Penn, Del., April 28, 1901.

SIR: Through the medical officer in command, national quarantine service on Delaware River and Bay, I have the honor to report the arrival at this station of the following vessels: April 22, 1901, British steamship *Wildcroft*, from Havana via Cardenas and Matanzas, with sugar; no passengers; Havana bill of health signed by Surgeon Glennan; Cardenas bill of health signed by Acting Asst. Surg. Enrique Saez; Matanzas bill of health signed bv P. A. Surg. G. M. Guitéras. April 24, 1901, British steamship *St. Hubert*, from Vera Cruz via Cardenas, with sugar; no passengers; Vera Cruz bill of health signed by Wm. W. Canada, United States consul, and D. E. Dudley, acting assistant surgeon, U. S. Marine-Hospital Service; Cardenas bill of health signed by Enrique Saez, acting assistant surgeon, U. S. Marine Hospital Service. April 25, 1901, British steamship *Georgian Prince*, from Havana, with molasses; no passengers; bill of health signed by Surgeon Glennan. April 26, 1901, British steamship *Grayfield*, from St. Thomas via Santiago, with ore; no passengers; Santiago bill of health signed by Assistant Surgeon Von Ezdorf. April 27, 1901, British steamship *King Gruffydd*, from Santiago, Manzanillo, and Guantanamo, with sugar; no passengers; Santiago bill of health signed by Assistant Surgeon Von Ezdorf; Manzanillo bill of health signed by Acting Asst. Surg. R. de Socaras; Guantanamo bill of health signed by Acting Asst. Surg. Luis Espin.

Respectfully, T. F. RICHARDSON.
Assistant Surgeon, U. S. M. H. S., In Command.

Arrival at Baltimore of vessels from West Indian and South American ports.

BALTIMORE, MD., *April 27, 1901.*

SIR: I have to report the arrivals for the week ended this day, as follows: April 23, British steamship *Baron Innerdale*, from Iquique, Chile, cargo, general. April 24, Norwegian steamship *Iberia*, from Banes, Cuba, with fruit. April 27, British steamship *Aldborough*, from Daiquiri, with ore.

Respectfully, JNO. R. KING,
Acting Collector.

BALTIMORE, MD., *May 4, 1901.*

SIR: I have to report the arrival at this port of the following-named vessels for the week ended this day: May 1, Norwegian steamship *Helga*, from Daiquiri, with ore. May 2, Norwegian steamship *Spero*, from Banes, with fruit; Norwegian steamship *Agnes*, from Banes, with fruit; British steamship *Wearside*, from Daiquiri, with ore. May 4, Norwegian steamship *Hero*, from Daiquiri, with ore.

Respectfully, WM. F. STONE,
Collector.

Reports from the Mexican border.

El Paso, Tex., April 27, 1901—Inspection service.—I have the honor to report the following summary of work at this station for the week ended April 27, 1901: Inspection Mexican Central Railroad passengers, 213; inspection Rio Grande and Pacific Railroad passengers, 23; inspection of immigrants, 48; disinfection of clothing, blankets, etc., 321 pieces;

disinfection of soiled linen imported for laundry, 421 pieces; disinfection soiled Pullman linen, 2,812 pieces; vaccination of immigrants' children, 7.

E. ALEXANDER,
Acting Assistant Surgeon, U. S. M. H. S.

Laredo, Tex., April 21, 1901—The case of smallpox in Nuevo Laredo.—Referring to my telegram of April 20, reporting 1 death from smallpox at Nuevo Laredo, Mexico, I investigated on morning of April 21 and found that the family had come from Guanajuato, Mexico, a short time before. The house was closed and disinfected, most of the bedding burnt, and all articles in house disinfected. The city health officer of Nuevo Laredo, Mexico, informed me that there were 3 others of family not immunes to smallpox and that he had telegraphed to Monterey for fresh vaccine, but could not obtain a supply at once. I gave him 3 points to vaccinate the 3 children known to have been exposed. I suppose there were probably other exposures, but I delayed full report until this date to try and discover other cases, but as yet I am informed that no other cases have been found.

H. J. HAMILTON,
Acting Assistant Surgeon, U. S. M. H. S.

Statistical reports of States and cities of the United States—Yearly and monthly.

GEORGIA—*Macon.*—Month of April, 1901. Estimated population, 28,000—white, 15,000; colored, 13,000. Total number of deaths, 27—white, 17; colored, 10—including whooping cough, 1, and 4 from phthisis pulmonalis.

INDIANA—*Muncie.*—Month of April, 1901. Census population, 20,942. Total number of deaths, 29, including 1 from tuberculosis.

IOWA—*Dubuque.*—Month of March, 1901. Census population, 36,297. Total number of deaths, 45, including whooping cough, 1, and 4 from tuberculosis.

KANSAS—*Leavenworth.*—Month of April, 1901. Census population, 21,556. Total number of deaths, 29, including 3 from tuberculosis.

MASSACHUSETTS—*Newton.*—Month of April, 1901. Census population, 33,587. Total number of deaths, 36, including 5 from tuberculosis.

Worcester.—Month of March, 1901. Census population, 118,421. Total number of deaths, 189, including diphtheria, 1; enteric fever, 1; whooping cough, 2, and 25 from tuberculosis.

MINNESOTA—*Winona.*—Month of April, 1901. Estimated population, 20,000. Total number of deaths, 23, including 1 from phthisis pulmonalis.

NEW JERSEY—*Paterson.*—Month of March, 1901. Estimated population, 106,737. Total number of deaths, 169, including diphtheria, 4; enteric fever, 1; scarlet fever, 1; whooping cough, 1, and 31 from tuberculosis.

NEW YORK.—Reports to the State board of health, Albany, for the month of March, 1901, from 156 cities, towns, and villages having an aggregate estimated population of 7,268,000, show a total of 11,913 deaths, including diphtheria, 277; enteric fever, 111; measles, 100; scarlet fever, 200; whooping cough, 57; smallpox, 39, and 1,293 from phthisis pulmonalis.

The Monthly Bulletin says—

La grippe is estimated to have caused during the month about 1,500 deaths, the same as in February, measuring the mortality from it chiefly by that of acute respiratory diseases, which during both months caused 82 deaths daily; for it was reported as the cause of death in but few cases. On only about 300 death returns out of 5,500 was la grippe noted as in any way contributory. In March, 1900, the most severe epidemic that has yet occurred was at its height and was then estimated to have caused 3,500 deaths.

Acute respiratory diseases caused 21.0 per cent of the total of the month, the same proportions as in February. Of 1,143 deaths from this cause (outside of New York City), 870 or 76.0 per cent were from pneumonia, which at that rate caused 1,900 during the month. Of these not due to pneumonia, the majority were from acute and capillary bronchitis and the rest from acute pleurisy. The highest mortality relatively from pneumonia was in the Hudson and Mohawk Valley district and the maritime, and the lowest in the central and western part of the State.

Zymotic diseases caused 1,116 deaths, or 9.4 per cent of the total mortality. This is a little above the average for this month, compared with which scarlet fever is increased by 100 deaths, measles and diarrheal diseases by 50 deaths each, whilst on the other hand, diphtheria is below the average in mortality. Scarlet fever was mostly fatal in the maritime district, though many epidemics are reported of a mild form of the disease. Measles, however, is of much more general distribution. Of 277 deaths from diphtheria, but 52 occurred outside of the city of New York. The mortality of early life is a little below the average for this month, 25.8 per cent of the deaths occurring under the age of five years. There were 2,163 deaths above the age of 70 years, or 19 per cent of the total, against 23 per cent in February.

There were 11,913 deaths from all causes, and a death rate of 19.2, a decrease from a daily rate of 394 in February to one of 384. During the first three months of the year there have been 35,529 deaths, including delayed returns, a daily rate of 395, which exceeds that of the same months in 1900 by 12 deaths daily. The average mortality for the past five years for these three months has been 32,000. Further compared with this average, this year shows 500 fewer deaths under the age of five years, the total of zymotic deaths being about the same for the two periods. Acute respiratory diseases caused nearly 1,000 more deaths than the average of the three months, and other local diseases were increased, all included, by about the same amount. Consumption, cancer, old age, and accident have each increased above the average by from 100 to 200 deaths. Part of this increase is to be credited to the prevalence of la grippe during this period, which, however, has recurred at this season with varying severity for the past twelve years, although the height of these epidemics has not always fallen upon these three months of the year.

NORTH CAROLINA.—Reports to the State board of health for the month of March, 1901, from 25 towns having an aggregate estimated population of 126,890—white, 77,539; colored, 49,151 show a total of 214 deaths—white, 106; colored, 108—including enteric fever, 2; measles, 1; scarlet fever, 1; whooping cough, 3, and 29 from phthisis pulmonalis.

PENNSYLVANIA—*Oil City.*—Month of March, 1901. Census population, 13.364. Total number of deaths, 22, including enteric fever, 1, and 1 from tuberculosis.

Mortality Statistics of 1,447 Cities and Towns of the United States for the Year ended December 31, 1899.

[This table was compiled from answers received to circular letters sent to cities and towns of the United States having a population of 1,000 or more. The cities and towns responding have been entered herein. Attention is called to the two columns showing the annual mortality rate per 1,000 of the population, the one table being based on the estimated population and the other upon the population according to the United States Census of 1900.]

Cities or towns.	Total deaths from all causes.	Population, U. S. census of 1900.	Annual mortality per 1,000 of population, U. S. Census, 1900.	Estimated population.	Annual mortality per 1,000 of the estimated population.	Deaths from— Phthisis pulmonalis.	Smallpox.	Enteric fever.	Measles.	Scarlet fever.	Diphtheria and membr. croup.	Whooping cough.

FOREIGN AND INSULAR.

BRITISH HONDURAS.

Report from Belize—Fruit port.

BELIZE, BRITISH HONDURAS, *April 21, 1901.*

SIR: I have the honor to submit report for week ended April 20. The following vessels have cleared from this port:

Date.	Vessel.	Master.	Number of crew.	Destination.	Number of passengers from Belize.	Number of passengers in transit.	Total number of passengers.	Number of pieces baggage disinfected.
Apr. 19	Ss. Esther.....	Stevenson.	19	New Orleans, La..	0	0	0	0
Do.....	Ss. Stillwater..	Galt.....	32	.....do.....	10	20	30	20
Do.....	Schr. Davy Crockett.	Merrett ...	7	Key West, Fla.....	0	0	0	0

The sanitary conditions of Belize and the adjacent country are good. Four deaths during the week, as follows: One from senility, 1 from pleurisy, 1 from acute nephritis, and 1 from debility.

Respectfully,

J. GREY THOMAS,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S Marine-Hospital Service.

CHINA.

Reports from Hongkong—Plague and smallpox.

HONGKONG, CHINA, *March 25, 1901.*

SIR: I have the honor to transmit herewith the report of inspection work at this station for the week ended March 23, 1901. I also transmit under same cover an abstract of mortality statistics in the colony of Hongkong during the month of February, 1901.

Four hundred and sixty-four baths were given during the week and 739 pieces of baggage were disinfected by steam. The sanitary reports for the week show 8 cases of plague and 10 deaths, 7 cases of smallpox and 6 deaths, and 1 case of enteric fever.

The plague cases have nearly all been of the bubonic type, though some of the infected glands are of small size and might easily be overlooked in a physical examination were it not for the tenderness and induration surrounding. The measures adopted to prevent the further spread of smallpox have been free vaccination, posting Chinese notices which call attention to the protection afforded by vaccination, and house-to-house visits by Chinese medical students urging vaccination.

At present there are 10 cases of smallpox in the hospital for infectious diseases.

Respectfully,

JOHN W. KERR,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

HONGKONG, CHINA, *April 2, 1901.*

SIR: I have the honor to transmit herewith the report of inspection work at this station for the week ended March 30, 1901.

Ten steamers were inspected during the week, 1,084 individuals were bathed, and 1,419 pieces of baggage were disinfected by steam.

Fourteen cases of plague were reported during the week and 10 deaths; 2 cases of enteric fever and 1 death; 13 cases of smallpox and 13 deaths.

No information is obtainable regarding the health of Canton, but a number of cases of varioloid are reported to have occurred on the U. S. S. *Monterey* lying at that port.

Respectfully,

JOHN W. KERR,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

COSTA RICA.

Report from Port Limon—Fruit port.

PORT LIMON, COSTA RICA, *April 20, 1901.*

SIR: I have the honor to submit my weekly report as follows: On April 14, cleared steam tug *C. W. Morse*, crew 24, no passengers nor baggage, having in tow the schooner barge *Atlas*, crew 12, no passengers nor baggage. April 15, cleared steamer *Scythian*, crew 19, no passengers nor baggage. April 18, steamship *Hispania*, crew 22, no passengers nor baggage. April 19, steamship *Anselm*, crew 40, no passengers nor baggage. All bound for the port of New Orleans. I inclose copies of certificates given them. Five deaths have occurred in Port Limon during the week ended April 17, viz, 1 negro infant, cholera infantum; 1 negro adult, female, meningitis; 1 negro adult, male, phthisis pulmonalis; 1 negro infant, tuberculosis; 1 negro adult, male, apoplexy syphilitic.

The case of yellow fever reported by me on April 5 has recovered, and on April 9 the premises, clothing, and bedding were thoroughly disinfected. More than ten days have elapsed since the disinfection and I have not been able to find or hear of any other case of yellow fever, hence I am giving vessels clean bills of health.

Respectfully, D. W. GOODMAN,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

CUBA.

Reports from Cienfuegos, Casilda, and Santa Cruz del Sur.

CIENFUEGOS, CUBA, *April 22, 1901.*

SIR: I have the honor to submit the following report for the district under my command for the week ended April 20, 1901: Fifteen deaths have occurred in this city; no contagious diseases reported; death rate 19.55. Causes of deaths are as follows: Uræmia, 2; tuberculosis, 2;

tetanus, infantile, 2; purpura, hæmorrhagica, 1; pleurisy, 1; intestinal obstruction, 1; anæmia, 1; malaria, 1; pernicious fever, 1; embolism, 1; insufficiency, aortic, 1; septicæmia, 1.

Of the total number of deaths 2 occurred in the civil hospital.

Eleven vessels inspected and passed, granted free pratique; 17 bills of health issued vessels leaving Cienfuegos; 39 health certificates issued passengers leaving Cienfuegos; 38 pieces baggage leaving Cienfuegos, inspected and passed, and 12 pieces baggage from Havana, destination Santiago and Manzanillo, labeled to be disinfected at those ports.

Casilda.—Acting Asst. Surg. Alejandro Cantero reports 4 deaths in city of Trinidad during week; no contagious diseases; 12 vessels inspected and passed, and 11 bills of health issued.

Santa Cruz del Sur.—Acting Asst. Surg. Juan R. Xiques reports 2 deaths in that port during week; no contagious diseases; 7 vessels inspected and passed, and 8 bills of health issued.

Respectfully,

T. D. BERRY,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

CIENFUEGOS, CUBA, *April 29, 1901.*

SIR: I have the honor to transmit the following report for the district under my command for the week ended April 27, 1901: Twenty-three deaths have occurred in this city, 4 of which were in the city hospital. No contagious diseases reported. Causes of deaths were as follows: Paludism, 3; embolism, 1; albuminuria, 1; tuberculosis, 1; tetanus, 1; mitral insufficiency, 1; cancer of the breast, 1; gastro-enteritis, 1; old age, 1; asphyxia, 1; sclerosis, arterial, 2; entero colitis, 1; pneumonia, 1; hemorrhage, cerebral, 1; broncho-pneumonia, 1; meningitis, 1; tetanus, infantile, 1; malaria, 1; enteritis, 1; scrofula, 1. Death rate per 1,000 for the week is 29.98.

Eight vessels were inspected and passed, granted free pratique; 18 bills of health issued vessels leaving Cienfuegos; 5 alien steerage passengers inspected and allowed to land; 56 health certificates issued passengers leaving Cienfuegos; 59 pieces of baggage leaving Cienfuegos inspected and passed; 5 pieces of baggage from Havana, destination Santiago and Manzanillo, labeled to be disinfected at those ports.

Casilda.—Acting Asst. Surg. Alejandro Cantero reports 6 deaths in the city of Trinidad during the week; no contagious diseases reported; 8 vessels inspected and passed; 8 bills of health issued vessels.

Santa Cruz del Sur.—Acting Asst. Surg. Juan R. Xiques reports no deaths in that port during the week; no contagious diseases reported; 3 vessels inspected and passed; 7 bills of health issued.

Respectfully,

T. D. BERRY,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Inspection of immigrants at Cienfuegos during the week ended April 27, 1901.

CIENFUEGOS, CUBA, *April 29, 1901.*

SIR: I herewith submit report of alien steerage passengers at this port during the week ended April 27, 1901: April 25, steamship *Wanderer*, from Liverpool, West Indies, and South America, with 5 immigrants.

Respectfully,

T. D. BERRY,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from Havana—A case of yellow fever.

HAVANA, CUBA, *May 1, 1901.*

SIR: I have the honor to submit the following report of transactions at this station for the week ended April 27, 1901: The weather continues cool and pleasant, and the sanitary condition of the city is excellent. There was a case of yellow fever reported on the 27th, but it has since been discharged cured, and at present there are no cases officially reported. I inclose the usual statistics for the week.

By direction ofthe chief quarantine officer.

Respectfully, ALEXANDER B. MCDOWELL,
Acting Assistant Surgeon, U. S. M. H. S.,
Executive Officer.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Reports from Nuevitas, Gibara, and Baracoa.

NUEVITAS, CUBA, *April 22, 1901.*

SIR: I have the honor to submit the following report for the week ended April 20, 1901:

Nine vessels arrived at this port and 11 bills of health were issued. There were 3 deaths, 1 from acute endocarditis, 1 from cirrhosis of liver, and 1 from pulmonary tuberculosis. The sanitary condition of the town is good.

Gibara.—Reports show the arrival of 12 vessels, the issuance of 12 bills of health, 1 death, and good sanitary condition.

Baracoa.—Reports show the arrival of 8 vessels, the issuance of 6 bills of healih, 4 deaths, and good sanitary condition. No quarantinable disease is reported at any point in the district.

Respectfully, OWEN W. STONE,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Reports from Santiago, Manzanillo, Guantanamo, and Daiquiri.

SANTIAGO DE CUBA, *April 19, 1901.*

SIR: I have the honor to submit herewith the following report for the week ended April 13, 1901:

Santiago.—During this period there was a total of 27 deaths, an increase of 11 over that of the previous week, making an annual rate of mortality of 32.65 per 1,000. The following are the causes of deaths reported, viz, fever, intermittent malarial, 1; tubercle of lungs, 2; sclerosis of the cord, 1; cerebral congestion and hemorrhage, 1; tetanus, infantile, 3; organic diseases of the heart, 2; bronchitis, chronic, 2; pneumonia, 1; diarrhea and enteritis (under 2 years), 6; diarrhea and enteritis (2 years and over), 1; intestinal obstructions, 1; nephritis, acute, 1; Bright's disease, 3; lack of care, 2. Total, 27.

Out of this number 11 deaths occurred in infants under 1 year of age;

3 deaths of infantile tetanus were in infants under 11 days; 2 deaths due to lack of care, under 16 days. The remaining 6 deaths were due to diarrhea and enteritis in infants under 1 year.

No unusual amount of sickness is known in the city. Malarial fevers prevail. A number of cases have come under my personal notice, some of these of a malignant form, in which crescent plasmodia were found in the blood.

Two vessels were disinfected during the week, the Norwegian steamship *Kong Frode*, destined for Mobile, Ala., via Port Antonio, Jamaica, and the American schooner *Major Pickands*, prior to sailing for Port Tampa, Fla.

On April 13, 1901, health certificates were issued to passengers embarking on the American steamship *Saratoga;* 63 pieces baggage were inspected, and 3 pieces, destined for places south of the southern boundary of Maryland, were disinfected.

The quarantine regulations, Article X, bearing on baggage and effects from Cuba and Porto Rico were put in force on this day, as the vessel would reach New York after April 15, 1901. After having put this regulation in force, I was notified by telegram by the chief quarantine officer, Surgeon Glennan, that the open quarantine season was extended until May 1, 1901.

Manzanillo.—Acting Asst. Surg. R. de Socarras reports 3 deaths, due to the following causes: Enteritis, 1; senile debility, 1; inanition, 1. Total, 3. Population, 14,464. Annual rate of mortality, 10.78.

Guantanamo.—Acting Asst. Surg. Luis Espin reports 7 deaths, due to the following causes: Fever, intermittent malarial, 1; organic diseases of the heart, 1; broncho pneumonia, 2; pulmonary congestion, 1; entero colitis, 1; accidental fall, 1. Total, 7. Population, 18,000. Annual rate of mortality, 20.22 per 1,000.

Daiquiri.—Nothing of interest reported.

Respectfully,

R. H. VON EZDORF,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

Respectfully, R. H. VON EZDORF,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

ENGLAND.

Report from London—Plague in Cape Town.

LONDON, ENGLAND, *April 20, 1901.*

SIR: I have the honor to report that the health of Great Britain remains in general satisfactory. The smallpox in Glasgow continues to decrease, but there are still a few new cases reported each day. Two deaths from smallpox occurred in Liverpool during the week ended March 13. The official report of plague from Cape Town for the week ended April 13, is as follows: Total number of new cases, 43, including 12 Europeans; total number of deaths, 22, including 4 Europeans. Up to the above date there had been a total of 392 cases and 152 deaths. The infection has been mostly confined to Cape Town and the cape peninsula, but a few cases have occurred outside this area. During the past week plague was reported among the rats at Port Elizabeth and later a case of plague was reported in the town. Sporadic cases of plague continue to occur in West Australia, and a case is also reported from Pinkenba, Queensland.

For the week ended March 11, there were no deaths from plague in Mauritius. The case of suspicious illness that occurred in this city recently, was probably not plague.

Respectfully, A. R. THOMAS.
Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

HAWAIIAN ISLANDS.

The transport Kilpatrick at Honolulu with smallpox on board.

HONOLULU, H. I., *April 14, 1901.*

SIR: I have the honor to report the arrival at this port yesterday of the U. S. army transport *Kilpatrick*, eight days from San Francisco, en route to Manila, P. I. She had on board 846 enlisted men, 60 officers, women, and children, and a crew of 152, making a total of 1,058 persons on board. On the day following their departure from San Francisco, there appeared among the troops 2 cases of smallpox of the discrete variety. These cases were isolated at once, but it was necessary on account of crowded quarters to put them with several cases of measles. Every one aboard was vaccinated, 15 per cent proving successful. The sick, together with those directly exposed, including nurses, were removed to the quarantine station at once and properly segregated. The colonel commanding the troops requested me to remove his men and disinfect his ship. This I agreed to do provided he would charter 2 safe vessels to receive those of his command in excess of 600, which was my limit

at the present time at the quarantine station, owing to the presence there of 70 persons either sick or undergoing detention, together with the necessity of reserving room for other passengers likely to arrive at any time. At this writing, the colonel has decided to take coal by lighter and proceed to Manila, provided no further outbreak occurs in the next seven days. I have made a detail from the station to show those on board how to disinfect properly and in addition to this have rendered them all the assistance possible.

The mail was disinfected by this office at the Channel Wharf prior to delivery to the post-office authorities.

Respectfully, L. E. COFER,
Passed Assistant Surgeon, U. S. M. H. S.,
In Command.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

HONDURAS.

Report from La Ceiba—Fruit port.

LA CEIBA, HONDURAS, *April 21, 1901.*

SIR: I have the honor to submit my report for the week ended April 20, 1901.

Four vessels cleared from this port for the United States: April 14, steamship *Dudley*, Anderson; crew, 18; destination, Mobile, Ala.; steamship *Ely*, Corning; crew, 21; destination, New Orleans, La. April 19, steamship *Sunniva*, Johannesen; crew, 14; destination, New Orleans, La; steamship *Usk*, Hurry; crew, 20; destination, New Orleans, La.

The health of La Ceiba and vicinity continues good.

Respectfully, R. H. PETERS,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Reports from Puerto Cortez—Fruit port.

PUERTO CORTEZ, *April 16, 1901.*

SIR: I have the honor to report the happenings at this port for the week ended Tuesday, April 16. Good health conditions still prevail here. No deaths. The following vessels were dispatched after complying with the regulations:

April 10, steamship *S. Oteri*, Norwegian, master, De Luca; arrived April 9, from New Orleans; crew, 34; passengers, 18; destination, New Orleans via Belize; baggage disinfected, trunks, 5; bags, 9; valises, 11; proper cargo, green fruit. April 11, steamship *Bratten*, Norwegian, master, Hahn; arrived April 7, from Mobile; crew, 15; passengers, none; cargo, green fruit; destination, Mobile, Ala. April 13, steamship *España*, Norwegian, master, Danielson; arrived April 12, from Mobile; crew, 10; passengers, 3; cargo, green fruit; baggage, none; special permission granted the 3 passengers making round trip to come ashore during daylight, by Mobile quarantine officer; destination, Mobile direct. April 13, steamship *Uto*, Norwegian, master, Bride; arrived April 11, from Havana; crew, 15; passengers, none; cargo, cattle; destination, Havana direct; issued no certificate to the

Uto; countersigned bill of health. April 14, steamship *Foxhall*, American, master, Larsen; arrived April 13, from New Orleans; crew, 25; passengers, none; cargo, green fruit; destination, Mobile direct.

Respectfully, SAMUEL HARRIS BACKUS,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

PUERTO CORTEZ, HONDURAS, *April 23, 1901.*

SIR: I have the honor to make a report of quarantine work done during the week ended April 23.

Health conditions are excellent—1 death. Dispatched the following vessels after they had complied with regulations: April 17, steamship *Stillwater*, Galt, American; crew, 24; passengers, 8; cargo, green fruit, baggage disinfected; trunks, 1; bags, 4; valises, 4; arrived from New Orleans, April 16; destination, New Orleans. April 20, steamship *Habil*, Goodmansen, Norwegian, crew, 14; passengers, none; cargo, green fruit; arrived April 16, from New Orleans; destination, Mobile. April 21, steamship *Adria*, Rasmussen, Norwegian; crew, 15; passengers, none; cargo, green fruit; arrived April 18, from Philadelphia; destination, Mobile, direct.

Respectfully, SAMUEL HARRIS BACKUS,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

PUERTO CORTEZ, HONDURAS, *April 9, 1901.*

SIR: I have the honor to hereby make my report for the week ended April 9. Health of this port and surrounding territory has been excellent; no deaths.

Inspected the following vessels: April 4, steamship *Habil*, Norwegian, Goodmansen, master; arrived, March 31; crew, 14; passengers, none; cargo, green fruit; destination, New Orleans direct. April 8, steamship *Alliance*, Norwegian, Nielsen, master; arrived April 4, crew 15, passengers none, cargo, green fruit; destination, Mobile, Ala., direct.

Respectfully, SAMUEL HARRIS BACKUS,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

ITALY.

Reports from Naples—Smallpox in Sicily.

NAPLES, ITALY, *April 13, 1901.*

SIR: I have the honor to report that for the week ended April 13, 1901, the following ships were inspected:

On April 10, the steamship *Liguria*, of the Italian General Navigation Company, bound with passengers and cargo for New York. There were inspected and passed 1,355 steerage passengers and 317 pieces of large and 1,700 pieces of small baggage. Three hundred and sixteen pieces of baggage were disinfected by steam.

On April 11, the steamship *Aller*, of the North German Lloyd Steamship Company, bound with passengers and cargo for New York. There were inspected and passed 867 steerage passengers and 129 pieces of

large and 1,160 pieces of small baggage. Two hundred and thirty-seven pieces of baggage were disinfected by steam.

On April 11, the steamship *Trojan Prince*, of the Prince Line, bound with passengers and cargo for New York. There were inspected and passed 996 steerage passengers and 55 pieces of large and 1,650 pieces of small baggage. Two hundred and sixty-nine pieces of baggage were disinfected by steam.

On April 12, the steamship *Patria*, of the Fabre Line, bound with passengers and cargo for New York. There were inspected and passed 1,156 steerage passengers and 60 pieces of large and 1,500 pieces of small baggage. Two hundred and sixty-four pieces of baggage were disinfected by steam.

On April 13, the steamship *Victoria*, of the Anchor Line, bound with passengers and cargo for New York. There were inspected and passed 1,112 steerage passengers and 60 pieces of large and 1,600 pieces of small baggage. Two hundred and fifty-six pieces of baggage were disinfected by steam.

On April 13, the steamship *Christiania*, of the Hamburg American Line, bound with passengers and cargo for New York. There were inspected and passed 608 steerage passengers and 16 pieces of large and 880 pieces of small baggage. One hundred and three pieces of baggage were disinfected by steam.

It is expected that the emigration from Naples to New York will be larger this month than it has been for years.

There is an epidemic of smallpox at Acireale, province of Catania, Sicily, and a number of cases are reported as black smallpox.

Smallpox is still prevalent at Naples, as will be seen from the abstract of bills of health incorporated herewith.

Baggage and other effects of all steerage passengers from Naples and all other places where smallpox is reported are disinfected by steam before being placed aboard vessels.

Respectfully, J. M. EAGER,
Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

NAPLES, ITALY, *April 20, 1901.*

SIR: I have the honor to report that for the week ended April 20, 1901, the following ships were inspected:

On April 16, the steamship *Massilia*, of the Fabre Line, bound with passengers and cargo for New York. There were inspected and passed 1,174 steerage passengers and 64 pieces of large and 1,640 pieces of small baggage. Two hundred and twenty-eight pieces of baggage were disinfected by steam.

On April 17, the steamship *Balilla*, of the Celli Line, bound with passengers and cargo for New York. There were inspected and passed 1,109 steerage passengers and 65 pieces of large and 1,700 pieces of small baggage. Two hundred and forty pieces of baggage were disinfected by steam.

On April 19, the steamship *Belgravia*, of the Hamburg-American Line, bound with passengers and cargo for New York. There were inspected and passed 2,223 steerage passengers and 277 pieces of large and 3,200 pieces of small baggage. Five hundred and forty-seven pieces of baggage were disinfected by steam.

On April 20, the steamship *Vincenzo Florio*, of the Italian General Navigation Company, bound with passengers and cargo for New York.

There were inspected and passed 908 steerage passengers and 187 pieces of large and 1,100 pieces of small baggage. Two hundred and forty pieces of baggage were disinfected by steam.

On April 20, the steamship *Werra*, of the North German-Lloyd Steamship Company, bound with passengers and cargo for New York. There were inspected and passed 925 steerage passengers and 160 pieces of large and 840 pieces of small baggage. Two hundred and twenty-four pieces of baggage were disinfected by steam.

As will be seen from the accompanying weekly abstract of bills of health, smallpox is on the increase at Naples.

Respectfully, J. M. EAGER,
Passed Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

JAPAN.

Report from Yokohama—Destruction of rats—The depilatory disease.

YOKOHAMA, JAPAN, *April 8, 1901.*

SIR: I have the honor to inform you that since my last report of April 2 no quarantinable disease has occurred in epidemic form in Japan proper, and that not a single case of cholera or plague has been met with.

In connection with plague, it is officially reported that since November, 1899, about 3,050,000 rats have been destroyed. Of this number, 232 were found to be infected by pest bacilli, all from the localities of Osaka, Kobe, and Hiogo, Wakayama, Gifu, and Shidzuoka, where, as I have before notified you, human plague has occurred. As the rats found dead or captured in Osaka are now found occasionally infected, we may, I think, confidently expect a speedy reappearance of the epidemic at that point.

In re the "depilatory disease" and referring to my report of March 6, I have to say that, while alarming statements continue to appear in the native journals, an official return lately issued with regard to the occurrence of this malady in this, Kanagawa Ken, with a population of 850,000, gives the total number of cases from 1899 to date as 114. It strikes me that in Japan as many cases of ordinary alopecia would be met with in such a population during this period.

Respectfully, STUART ELDRIDGE,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

A death from plague in Wakayama Ken.

YOKOHAMA, JAPAN, *April 12, 1901.*

SIR: Official notice comes this morning of the occurrence of 1 case of plague, taken ill on the 10th and dying on the 11th, in the same locality of Wakayama Ken in which the epidemic of last year prevailed. Special sanitary officials have been already dispatched from Tokyo to the affected locality.

Should a second case appear, I will telegraph you at once.

Respectfully, STUART ELDRIDGE,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

MEXICO.

Report from Vera Cruz—A death from yellow fever.

VERA CRUZ, MEXICO, *April 24, 1901.*

SIR: I have the honor to submit the following report for the week ended April 20, 1901:

Another death from yellow fever occurred during the week, a prominent American of this city. The patient had lived in Vera Cruz eleven years, and more than twenty years in Mexico. About three months ago he made a short business trip to New York, and had been back but a short time before he was taken ill. His sickness was at first diagnosed as pernicious malaria, and it is probable that he suffered a mixed infection. Three days before the end, suppression of urine and other symptoms characteristic in fatal cases developed, the patient dying in uræmic convulsions.

The long residence, covering a period of eleven years, in a place where the disease has been prevailing before an attack of the disease is rather unusual. The Havana records, I think, give but 2 cases, 1 reported by P. A. Surg. M. J. Rosenau in 1899, and the other recently reported by Surg. A. A. Glennan.

The Ward Line steamer *Havana* left for New York via Havana with 69 passengers.

Respectfully, D. E. DUDLEY,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

[Inclosure.]

Mortality report for the week ended April 20, 1901.

Yellow fever	1	Tuberculosis	18
Malaria	1	Deaths from causes	39

Reports from Progreso.

PROGRESO, MEXICO, *April 20, 1901.*

SIR: I have the honor to make the following report for the week ended April 20:

There were 2 cases of smallpox reported during the week, but no deaths. Seven deaths were recorded from all causes. There have been no deaths from contagious diseases for four weeks.

The epidemic in Merida continues to diminish, but 3 or 4 deaths are still reported every day from smallpox. The general health condition of Progreso is very good. There has been no sickness of any kind in the shipping for the past three weeks.

Respectfully, S. H. HODGSON,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

PROGRESO, MEXICO, *April 26, 1901.*

SIR: I have the honor to make the following report for the week ended April 26, 1901:

From contagious diseases there were no deaths, and only 5 deaths reported from all causes There were no cases of contagious diseases of any kind reported, the 2 cases of varioloid that were reported the week previous having recovered. During the week I inspected 7 vessels and

issued a bill of health to 1 vessel without inspection. The vessel not inspected was the Spanish steamship *Berenguer el Grande*, from Spain via Havana, proceeding to New Orleans via Vera Cruz. The vessel was anchored about 5 miles offshore, and the only means that I had of boarding her was by a small sailboat, and as a gale of wind was blowing and a high sea running, I declined to make the trip, and issued a bill of health setting forth the facts on the face of it.

The mail steamers have a steam tug for tender, which is tolerably safe for boarding purposes, but the other steamers rely upon small sailboats for attention, and they are unreliable and dangerous.

The larger part of the vessels leaving here come to the docks for cargo, where they are easily boarded.

Respectfully, S. H. HODGSON,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

NICARAGUA.

Reports from Bluefields—Fruit port.

BLUEFIELDS, NICARAGUA, *April 25, 1901.*

SIR: I have the honor to submit herewith sanitary report for the week ended April 24, 1901:

The following vessels were inspected, clearing for ports in the United States: April 18, Norwegian steamship *Alabama*, Gjemery, master; crew, 18; passengers, 11; Marine Medical Officer W. G. Thigpen, Louisiana State board of health; cargo, fruit; cleared for New Orleans direct. April 21, Norwegian steamship *Hiram*, Pedersen, master; crew, 15; passengers, 6; Marine Medical Officer Thomas S. Adams, Louisiana State board of health; cargo, fruit; cleared for New Orleans direct.

There has been 1 death in the town of Bluefields during the past week, which occurred on the 24th instant, a colored female, aged 86, from senile debility.

The town of Bluefields proper, the San Paulo Hospital, and adjacent country, continue to remain without suspicion as to the existence of any contagious or infectious disease.

I inclose herewith 2 U. S. Marine-Hospital certificates, triplicates; also 16 U. S. Marine-Hospital passenger certificates (duplicates).

Respectfully, WM. H. CARSON,
Acting Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

PHILIPPINE ISLANDS.

Mortality statistics of plague and smallpox for January, 1901.

MANILA, P. I., *March 24, 1091.*

SIR: I have the honor to transmit herewith mortality statistics of Manila for the month of January, 1901, compiled and furnished by the board of health.

Respectfully, J. C. PERRY,
Passed Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for the Philippine Islands.

The SURGEON GENERAL,
U. S. Marine-Hospital Service.

PORTO RICO.

Report from Ponce.

PONCE, P. R., *April 22, 1901.*

SIR: Through the chief quarantine officer for Porto Rico, I have the honor to transmit herewith the quarantine and abstract of bills of health reports for the week ended April 20, 1901. Six vessels were inspected, 3 of which were held in quarantine to detain nonimmunes, viz, provisional flag steamship *Julia*, from Havana; Spanish steamship *Isla de Panay*, from Havana; German steamship *Polaria*, from Colombian ports and St. Thomas. All transacted their business under supervision and left the same day. Five bills of health were issued

During the week, 9 new cases of smallpox, and 9 recoveries were reported, leaving 18 still under treatment. I think the continuation of the disease is due to a few cases not removed to the smallpox hospital, but very lately quarantined in the city. Yellow flags are placed on these houses but no guards. I have seen the quarantined people in close conversation with others at the doors, and with doors and windows wide open. There may be also some concealed cases.

Respectfully, W. W. KING,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*

Inspection of immigrants at San Juan during the week ended April 20, 1901.

SAN JUAN, P. R., *April 22, 1901.*

SIR: I herewith submit report of alien steerage passengers arriving at this port during the week ended April 20, 1901:

Date.	Vessels.	Where from.	No. of immigrants.
Apr. 19	Provisional flag steamship Julia	Havana, Nuevitas, Gibara, Baracoa, Santiago, St. Domingo, Macoris, Ponce, and Mayaguez.	17
Do...	Spanish steamship Isla de Panay	Havana, Port Limon, Colon, Sabanilla Bay, Puerto Cabello, La Guayra, and Ponce.	5
	Total		22

Respectfully, H. S. MATHEWSON,
Assistant Surgeon, U. S. M. H. S.,
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL, *U. S. Marine-Hospital Service.*

Inspection of immigrants at the subports of Porto Rico during the week ended April 20, 1901.

SAN JUAN, P. R., *April 22, 1901.*

SIR: I submit herewith report of alien steerage passengers arriving during the week ended April 20, 1901, at subports of Porto Rico:

Mayaguez.—April 14, American schooner *Victoria*, from St. Domingo, with 1 immigrant. April 16, French steamship *St. Domingue*, from Port au Prince, Petit Goave, Jeremie, Les Cayez, Jacmel, and St. Domingo, with 5 immigrants. Total, 6. Other subports, no transactions.

Respectfully,

H. S. MATHEWSON,
Assistant Surgeon, U. S. M. H. S.
Chief Quarantine Officer for Porto Rico.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

STRAITS SETTLEMENTS.

No plague at Singapore for ten days.

SINGAPORE, *March 21, 1901.*

SIR: I have the honor to transmit the inclosed copy of a letter from the acting colonial secretary of the Straits Settlements under date the 17th instant, reporting that the port of Singapore is now free from contamination, no cases of plague having occurred here for the full period of ten days, and requesting that any quarantine restrictions imposed by my Government be at once removed.

The restrictions referred to were imposed in accordance with United States quarantine regulations, as well as to meet the request of the chief quarantine officer at Manila, P. I., and consisted of the prohibition of shipments hence, of various articles to the Philippine Islands, and the requirement from passengers for any port in said slands of a certificate by the medical officer of this consulate stating that they had been examined and found free of infection.

I have duly notified owners, masters, and agents of vessels, and shippers to the Philippines that these restrictions have now been removed.

J. M. CAMPBELL,
Acting United States Vice and Deputy Consul-General.

Hon. ASSISTANT SECRETARY OF STATE.

[Inclosure.]

SINGAPORE, *March 17, 1901.*

SIR: I am directed to report that no case of plague has now occurred in Singapore for the full period of ten days and that the port is, therefore, free from contamination and to request that any quarantine restrictions imposed by your Government may be at once withdrawn.

Clean bills of health are being granted and inspection of passengers will, of course, cease from to-day.

Respectfully,

A. W. O'SULLIVAN,
For Acting Colonial Secretary, Straits Settlement.

The ACTING VICE AND DEPUTY CONSUL-GENERAL
FOR THE UNITED STATES OF AMERICA, *Singapore.*

Foreign and insular statistical reports of countries and cities—Yearly and monthly.

AFRICA—*Sierra Leone.*—Two weeks ended April 5, 1901. Estimated population, 35,000. Total number of deaths, 22. No infectious or contagious diseases.

ARGENTINA—*Buenos Ayres.*—Month of February, 1901. Estimated population, 825,858. Total number of deaths, 1,058, including diphtheria, 9; enteric fever, 19; measles, 10; scarlet fever, 29; smallpox, 32, and 35 from tuberculosis.

BRAZIL—*Ceara.*—Month of February, 1901. Estimated population, 50,000. Total number of deaths, 165, including enteric fever, 12, and 2 from measles.

Month of March, 1901. Total number of deaths, 215, including enteric fever, 32, and 3 from measles.

BRITISH WEST INDIES—*Trinidad—Port of Spain.*—Four weeks ended March 30, 1901. Estimated population, 34,037. Total number of deaths, 109, including measles, 1; whooping cough, 2, and 14 from tuberculosis.

CHILE—*Antofagasta.*—Month of March, 1901. Estimated population, 16,000. Total number of deaths, 66, including whooping cough, 3, and 6 from phthisis pulmonalis.

FRANCE—*Nice.*—Month of March, 1901. Estimated population, 108,227. Total number of deaths, 257, including diphtheria, 4; enteric fever, 2; measles, 1; scarlet fever, 2, and 30 from tuberculosis.

St. Etienne.—Two weeks ended April 15, 1901. Estimated population, 146,030. Total number of deaths, 142, including diphtheria, 3, and 17 from tuberculosis.

GERMANY—*Dresden.*—Month of February, 1901. Estimated population, 398,650. Total number of deaths, 525, including diphtheria, 5; measles, 3; whooping cough, 6, and 67 from phthisis pulmonalis.

Kehl.—Month of March, 1901. Estimated population, 152,826. Total number of deaths, 301, including diphtheria, 6; whooping cough, 2; typhus fever, 1, and 39 from tuberculosis.

GREAT BRITAIN—*England and Wales.*—The deaths registered in 33 great towns in England and Wales during the week ended April 13, 1901, correspond to an annual rate of 19.2 per 1,000 of the aggregate population, which is estimated at 11,789,099. The highest rate was recorded in Liverpool, viz, 25.0, and the lowest in Croydon, viz, 11.2.

London.—One thousand six hundred and thirty-three deaths were registered during the week, including measles, 52; scarlet fever, 8; diphtheria, 26; whooping cough, 74; enteric fever, 4, and diarrhea and dysentery, 9. The deaths from all causes correspond to an annual rate of 18.3 per 1,000. In Greater London 2,162 deaths were registered, corresponding to an annual rate of 16.6 per 1,000 of the population.

In the "outer ring" the deaths included 8 from diphtheria, 14 from measles, 2 from scarlet fever, and 21 from whooping cough.

Ireland.—The average annual death rate represented by the deaths registered during the week ended April 13, 1901, in the 22 principal town districts of Ireland was 27.9 per 1,000 of the population, which is estimated at 1,058,722. The lowest rate was recorded in Clonmel, viz, 9.7, and the highest in Tralee, viz, 61.6 per 1,000. In Dublin and suburbs 242 deaths were registered, including enteric fever, 2; scarlet fever, 2, and 8 from whooping cough.

Scotland.—The deaths registered in 8 principal towns during the week ended April 13, 1901, correspond to an annual rate of 23.2 per 1,000 of the population, which is estimated at 1,630,155. The lowest mortality was recorded in Perth, viz, 16.8, and the highest in Glasgow, viz, 24.1 per 1,000. The aggregate number of deaths registered from all causes was 726, including diphtheria, 4; measles, 17; scarlet fever, 3; smallpox, 6, and 51 from whooping cough.

JAPAN—*Nagasaki.*—Ten days ended March 31, 1901. Estimated population, 131,701. Number of deaths not reported. One death from enteric fever reported. No infectious or contagious disease prevailing.

MALTA.—Week ended April 6, 1901. Estimated population, 181,698. Total number of deaths, 76, including enteric fever, 1, and 2 from whooping cough.

Two weeks ended April 13, 1901. Estimated population, 181,698. Total number of deaths, 89, including diphtheria, 1, and 1 from whooping cough.

SPAIN—*Malaga.*—Two weeks ended March 31, 1901. Estimated population, 126,000. Total number of deaths, 198, including enteric fever, 1; leprosy, 1, and 3 from smallpox.

SWITZERLAND.—Reports from 18 cities and towns, for the week ended April 6, 1901, show a total of 310 deaths, including diphtheria, 1; enteric fever, 3; measles, 4; scarlet fever, 1; whooping cough, 2, and 33 from phthisis pulmonalis.

Cholera, yellow fever, plague, and smallpox, December 28, 1900, to May 10, 1901.

[Reports received by the Surgeon-General United States Marine-Hospital Service from United States consuls through the Department of State and other sources.]
